Welcome to the Virginia Tech Department of Mathematics! We are Jessica StClair and Eric Ufferman, and will serve as your summer advisors.

We will hold virtual academic advising & course registration sessions from July 6-22. The sessions will be held at 10am EDT on Mondays, Wednesdays and Fridays and also at 1:30pm EDT on Tuesdays and Thursdays. Sign up for the sessions will be done through the Navigate platform.

You will receive a link to sign up for an advising session once you have completed the College of Science Expected Courses/Credits Worksheet. Links to the worksheet and the portal for the upload can be found here:

https://www.science.vt.edu/resources/orientation.html

Appointments are first come, first-served, so please complete and submit the worksheet promptly.

In addition, the College of Science has asked you to register for courses in HokieScheduler, which is open between June 13 and July 1. Again, the sooner you do this, the better. We know that choosing courses can be daunting, and have attached a guide to assist you with the process. We have also attached a list of courses appropriate for first-semester students, organized by Pathways concept.

A typical first-year student will register for three math courses: calculus; programming for mathematics; and our first-year experience course. Additionally, the student will take first-year writing, and choose other courses as necessary to have a total of 14-17 credits on their schedule. The guide lays out the criteria for choosing these courses in detail. In some cases – for example, if you already have credit for first-semester calculus – you may need to switch out one of the courses that is preloaded in HokieScheduler.

Please contact us at mathorientation@vt.edu if you have any questions about registration or signing up for a virtual academic advising & course registration session. We look forward to hearing from you.
